

Simplifying Quality Assurance in Directed Energy Deposition

Patented cooling-rate control

VIR Camera

Dual High Dynamic Range (HDR) vision and infrared imaging for coaxial DED process monitoring

MOC Studio

Complete software package for real-time process monitoring, optimization, and control

Process Monitoring

Real-time process monitoring that provides real-time dimensional and temperature measurements

Process Optimization

Analyze and augment recorded process data to save up to 20% of process development time

Process Control

Patented control system to correct errors and produce consistent geometry and microstructure
